# Subject Index

A

Abscisic acid
  in Arabidopsis embryo, germination and, 415
  Arabidopsis radicle emergence and, 1179
  maize root elongation and, 967
Acetate, effect on *Chlamydomonas reinhardtii* autotrophy, 1439
Acetyl-coenzyme A carboxylase, nuclear and plastidic genes coding for, in soybean, 1057
Acifluorfen, resistance to, in tomato, 75, 987
Aconitase, from tobacco, nitric oxide and, 573
Actin-binding proteins, villin-like, in Arabidopsis, 35
Activation tagging, in Arabidopsis, 1003
β-Adaptin homologs of clathrin-coated vesicles, in Arabidopsis, 620
*S*-Adenosylmethionine decarboxylase
  in broad bean, 620
  in sweet potato leaves, 1459
*S*-Adenosylmethionine synthetase, in petunia, 1457
ADP-glucose pyrophosphorylase promoter, in barley, 1459
Alcohol dehydrogenase, in developing fruit of grape, 619
*Aleurites fordii* (*see* Tung)
Alfalfa, winter survival of, iron-superoxide dismutase expression and, 1427
Algae (*see also specific alga*)
Allene oxide synthase, tomato defense gene activation and, 1335
Alliinase, from onion roots, 1269
*Allium cepa* (*see* Onion)
*Allium porrum* (*see* Leek)
*Alnus incana*, root nodules of, nitrogenase activity in, 553
Aluminum stress
  in Arabidopsis, 657
  in maize, 945
Amino acid transporters, in developing pea seeds, 319
1-Aminocyclopropane-1-carboxylate synthase, in apple, 620
Amylopectin crystal, biosynthesis of, 989
Anion conductance, in barley root xylem, 243
Anoxia tolerance, in maize root tips, 295
Antimicrobial protein, from pokeweed seeds, 1015
*Antirrhinum majus* (*see* Snapdragon)
Apical meristems, of snapdragon, developmental zones in, 1137
*Apium graveolens* (*see* Celery)
Apomixis-related cDNA, from *Chlamydomonas reinhardtii*, 293
Apoplastic ice, $CO_2$ thermal effect on, in rye and oat, 861
Apple
  1-aminocyclopropane-1-carboxylate synthase in, 620
  heat shock protein from, 292
  *St-RNase* gene in, similarity to Japanese pear, 620
Apricot, fruit of, zeaxanthin epoxidase coding gene in, 291
Aquaporin activity, of plasma membrane proteins, in maize, 1025
Arabidopsis
  activation tagging in, 1003
  aluminum stress and/or oxidative stress in, 657
  antisense *HEMA1* mRNA in, effect on heme and chlorophyll biosynthesis, 49
  AtJ20 protein in, 620
  ATMPK4 of, ATMEK1 activation of, 1301
  ATP-phosphoribosyl transferase in, histidine biosynthetic pathway and, 907
  $Ca^{2+}$ pump ACA2 of, calmodulin activation of, 157
  chloroplast stroma of, protein 14–3–3 in, 235
  clathrin-coated vesicle β-adaptin homologs in, 620
  cotton cellulose synthase gene homology with, 291
  cytokinin or auxin content/signaling mutations in, 721
  geranylgeranyldiphosphate synthases in, 1045
  glycinebetaine production in, stress tolerance and, 747
  $H^+$-pyrophosphatase-like protein in, expression in yeast, 620
  *HKT1* gene of, $Na^+$ currents and uptake mediated by, 1249
  hypocotyls of
    elongation and flowering times of, 1149
    high-irradiance response of, phytochrome A photoperception in, 147
  intron-mediated gene expression in, 535
  leaves of, senescence of, bifunctional nuclease in, 169
  mesophyll cells of, inositol phosphate metabolism in, 1209
  molecular chaperone AtJ3 genomic sequence in, 291
  osmotic stress in, proline in protection from, 1129
  phytochelatin from, arsenic detoxification by, 793
  plastidial phosphoglucomutase in, 1193
  radicle emergence in, abscisic acid and sugar effects on, 1179
  root hair formation in, AtPRP3 protein expression and, 705
  root(s) of
    clubroot disease of, nitrilase in, 369
    gravitropism of
      auxin transport and, 481
      phototropism and, 453
    iron deficiency of, 1109
  seed coat of, mucilage cells of, 345
  seedlings of, phytochrome-regulated genes in, 15
  seeds of
    germination of, gibberellin and, 415
    jojoba embryonic wax synthase expression in, 645
    small heat shock proteins in, desiccation tolerance and, 1099
    testa effects on, 403, 415
  stems of, senescence of, bifunctional nuclease in, 169
  sugar signaling mutant of, hypersensitivity toward proline, 357
  sulfate assimilation by nitrogen in, 737
  threonine dehydratase/deaminase in, isoleucine feedback insensitivity of, 619
  villin-like actin-binding proteins in, 35
Arabinogalactan proteins, in plant development, 3
Arsenic
  in Indian mustard, 1171
  phytochelatin detoxification of, 793
AT-hook DNA-binding protein, from snapdragon, 292
AtJ20 protein, in Arabidopsis, 620
ATNHX1 transporter, 999
ATP:citrate lyase, compartmentation of, 1225
  fatty acid synthesis and, 1231
ATP-phosphoribosyl transferase, histidine biosynthetic pathway and, in Arabidopsis, 907
AtPRP3 protein, Arabidopsis root hair formation and, 705
Auxin
  in Arabidopsis mutant, 721
  cell wall-modifying protein regulation by, in tomato fruit, 527
  *rolB* gene expression in tobacco leaves regulated by, oligogalacturonide-induced $H_2O_2$ and, 1379
  in shade avoidance, 621
Auxin metabolism, in maize root apical meristem, 925
Auxin transport, gravitropism and, in Arabidopsis roots, 481
*Avena sativa* (*see* Wheat)

B

Bark, cold-acclimating, of poplar, β-1,3-glucanase from, 1458
Barley
  ADP-glucose pyrophosphorylase promoter in, 1459
  cysteine endoprotease cleavage sites of, 137
  dipeptidyl peptidase IV of, purification and characterization of, 425
  leaves of, ion accumulation and fluxes in, 835
  roots of
    anion conductance into xylem parenchyma of, 243
    nitrate transporters in, 783
  senescence of, bifunctional nuclease in, 169
  starch synthase I gene in, 1459
Bean (*see also* Broad bean; Soybean)
Beet
  cytoplasmatic malate dehydrogenase in, 619
  leaf protoplasts of, iron reduction by, 337
Bell pepper, seeds of, oligosaccharides and longevity of, 1217

Berry, of grape
alcohol dehydrogenase in, 619
cell wall stress response proteins during ripening of, 803
mitochondrial malate dehydrogenase in, 1459
*Beta vulgaris* (*see* Beet)
Betaine production, stress tolerance and, 747
Bifunctional nuclease, in Arabidopsis senescence, 169
Border cell production, in pea root tips, $CO_2$ level and, 181
*Brassica juncea* (*see* Indian mustard)
*Brassica napus* (*see* Rapeseed)
*Brassica oleracea* (*see* Cauliflower)
Brassinosteroid synthesis, in tomato, 85
Broad bean
*S*-adenosylmethionine decarboxylase in, 620
stomatal opening in, ultraviolet action spectrum and, 99
Broccoli, florets of, metallothionein in, 1457
Buds, of leafy spurge, light-harvesting chlorophyll-binding protein in, 1459
Bundle sheath cells, of maize, glutathione reductase protein in, 667

C

$Ca^{2+}$-ATPase, vacuolar, in cauliflower, 517
Calcium, eEF1A proteolysis regulated by, in carrot, 957
Calcium pump, calmodulin activation of, in Arabidopsis, 157
Calcium-dependent protein kinase, in sandalwood, 1035
Calmodulin, $Ca^{2+}$ pump ACA2 activation by, in Arabidopsis, 157
*Calystegia sepium* (*see* Hedge bindweed)
*Capsicum annuum* (*see* Bell pepper)
Carbon dioxide
concentration of, effects on young wheat plants, 1399
pea root tip border cell production and, 181
thermal effect of on apoplastic ice, in rye and oat, 861
Carbon partitioning, in developing rapeseed embryos, 767
β-Carotene synthesis, in *Dunaliella salina*, 609
Carrot
calcium-regulated eEF1A proteolysis in, 957
VAMP-like protein in, 25
Catalase, from *Chlamydomonas reinhardtii*, 293
Catalase isozyme polypeptides, in rye, 1447
*Catharanthus roseus*, crGRP2 and crGRP3 encoded in, 1459
Cathepsin B-like cysteine proteinase, in sweet potato tuberous root, 620
Cauliflower, vacuolar $Ca^{2+}$-ATPase in, 517
Celery, sucrose transporter of, in salt stress, 1447
Cell cycle, in germinating tomato seeds, 327
Cell wall pit fields, pectic polysaccharides and, in tomato fruit, 775
Cell wall stress response proteins, in ripening grape berry, 803
Cell wall-modifying proteins, auxin regulation of, in tomato fruit, 527
Cellulose synthase, from cotton, homology with Arabidopsis gene, 291
Chickpea, phenylalanine ammonia-lyase in, 1458
Chilling, maize respiration and, 199
*Chlamydomonas reinhardtii*
apomixis-related cDNA in, 293
autotrophy in, acetate and, 1439
catalase from, 293
nitrate assimilation in, 283
photobiological hydrogen gas production in, 127
Chlorophyll biosynthesis, in Arabidopsis, *HEMA1* mRNA effect on, 49
Chlorophyll-binding protein, light-harvesting, in leafy spurge buds, 1459
Chloroplasts
of Arabidopsis, protein 14–3–3 in, 235
of *Haematococcus pluvialis*, phytoene desaturase in, 1261
of leek, lyso-phosphatidylcholine import into, 845
of pea, protein import into, Toc159 receptor and, 813
of sugar cane, orthophosphate dikinase from, 293
of tobacco, electron transport and Rubisco activity in, 491
of wheat, hexaploid, nucleotide sequence of, 292
Cinnamic acid 4-hydroxylase transgenic plants, phenylpropanoid pathway in, 107
*Citrus limon* (*see* Lemon)
Clathrin-coated vesicle β-adaptin homologs, in Arabidopsis, 620
Clubroot disease, in Arabidopsis, nitrilase in, 369
Coleoptiles, of rice, elongation of, nucleoside diphosphate kinase and, 447
Copper/zinc superoxide dismutase, in pineapple, 619
Corn (*see* Maize)
Cotton
cellulose synthase from, homology with Arabidopsis gene, 291
cotyledons of, salicylic acid and oxidative burst in, in response to *Xanthomonas campestris*, 757
Rac-like GTP-binding protein from, 292
Cotyledons, of cotton, salicylic acid and oxidative burst in, in response to *Xanthomonas campestris*, 757
Cucumber
desiccation-induced metabolic imbalance in, 597
polypeptide of photosystem II in, 620
*Cucumis melo* (*see* Melon)
*Cucumis sativa* (*see* Cucumber)
*CURL-3* gene, brassinosteroid biosynthesis and, in tomato, 85
Cyanobacteria
photosynthesis and nitrogen fixation genes in, 731
photosystems I and II in, osmotic stress inactivation of, 1201
*psbA* gene expression in, redox control of, 505
Cyanogenic glucoside biosynthesis, in seaside arrow grass, 1311
Cyclic nucleotide phosphodiesterase, phosphate regulation of, in tomato, 543
Cystathionine-γ-synthase, in potato, 293, 619
Cysteine endoprotease, prediction of protein cleavage sites by, in barley, 137
Cysteine proteinase
cathepsin B-like, in sweet potato tuberous root, 620
in rice, 57
Cytochrome *b/f* complex
in *psbA* gene expression in cyanobacterium, 505
in tobacco chloroplast Rubisco activity, 491
Cytokinin, in Arabidopsis mutant, 721

D

*Datisca glomerata* nodule mRNA, similarity to soybean early nodulin gene, 1073
*Daucus carota* (*see* Carrot)
Desiccation
metabolic imbalance induced by, in cucumber and pea, 597
tolerance of, Arabidopsis seed heat shock proteins and, 1099
Dimethylselenoniopropionate, selenium assimilation and volatilization from, Indian mustard in, 1281
Dipeptidyl peptidase IV, of barley, purification and characterization of, 425
Diphenyl-ether herbicide, resistance to, in tomato, 75, 987
DNA-binding protein, AT-hook, from *Antirrhinum majus*, 292
*DUMPY* gene, brassinosteroid biosynthesis and, in tomato, 85
*Dunaliella salina*, β-carotene synthesis in, 609

E

Ectoine, tobacco hyperosmotic tolerance and, 1239
eEF1A proteolysis, calcium-regulated, in carrot, 957
Electron transport, Rubisco activity and, in tobacco chloroplasts, 491
Electronic plant gene register, 291, 619, 1457
*elf3*, in control of elongation and flowering times of Arabidopsis hypocotyls, 1149
Embryo
of Arabidopsis, abscisic acid in, 415
of jojoba
fatty acyl-coenzyme A in, expression in rapeseed, 635
wax synthase in, production of in transgenic Arabidopsis seeds, 645
of rapeseed, carbon partitioning and plastidial metabolism of, 767
Endosperm, of barley, starch formation in, 1459
Ethylene, melon fruit suppressed by, 977
*Eucalyptus pauciflora* (*see* Snow gum)

F

Fatty acid, biosynthesis and elongation of, 275
Fatty acid desaturase, omega-3, from tung seeds, 292

Fatty acid synthesis, tobacco plastidic ATP: citrate lyase and, 1231
Fatty acyl-coenzyme A, of jojoba embryo, expression in rapeseed, 635
Fenoxaprop-ethyl, wheat GST and, 692
Fern, phototropin in, 1458
Ferredoxin, sulfite reductase dependent on, in maize, 887
Floral scents, biochemical and molecular genetic aspects of, 627
Florets, of broccoli, metallothionein in, 1457
Fruit
  of apricot, zeaxanthin epoxidase coding gene in, 291
  of grape
    alcohol dehydrogenase in, 619
    cell wall stress response proteins during ripening of, 803
    mitochondrial malate dehydrogenase in, 1459
  of melon, ethylene-suppressed, 977
  of tomato
    cell wall pit fields in, pectic polysaccharides and, 775
    cell wall-modifying proteins in, auxin regulation of, 527
Fusicoccin, radish plasma membrane $H^+$-ATPase activation by, phenylarsine oxide and, 463

G

GAPDH (*see* Glyceraldehyde 3-phosphate dehydrogenase)
GDP-fucose uptake, during xyloglucan biosynthesis, in pea, 867
Geranylgeranyldiphosphate synthases, in Arabidopsis, 1045
Gibberellin
  Arabidopsis seed germination and, 415
  maize seed development and, 1081, 1089
  rice stem growth and, 695
  tomato ovary parthenocarpy and, 471
*Ginkgo biloba*, Hechtian strands of, in cold-hardened cells, 1365
β-1,3-Glucanase, from poplar cold-acclimating bark, 1458
β-Glucosidase aggregating factor, in maize, 1458
β-Glucosidase-aggregating factor, in maize, 563
Glucoside biosynthesis, cyanogenic, in seaside arrow grass, 1311
Glutamine synthetase, cytosolic, in rice, 1459
γ-Glutamyl transpeptidases, from tomato, affinity for glutathione and glutathione *S*-conjugates, 1417
Glutathione reductase, in maize bundle sheath cells, 667
Glutathione *S*-transferase, from wheat, effect on fenoxaprop-ethyl, 692
Glyceraldehyde 3-phosphate dehydrogenase, in tobacco chloroplast Rubisco activity, 491
*Glycine max* (*see* Soybean)
Glycinebetaine production, stress tolerance and, 747
*Gossypium hirsutum* (*see* Cotton)
Granule-bound starch synthases I and II, in wheat, 255
Grape, berry of
  alcohol dehydrogenase in, 619
  cell wall stress response proteins during ripening of, 803
  mitochondrial malate dehydrogenase in, 1459
Grass (*see* Seaside arrow grass)
Gravitropism, of Arabidopsis roots
  auxin transport and, 481
  phototropism interaction with, 453
GST (*see* Glutathione *S*-transferase)
GTP-binding protein, Rac-like, from cotton, 292
Guard cells, of potato, *StGCPRP* gene in, 677

H

$H^+$-ATPase
  in radish plasma membrane, phenylarsine oxide and fusicoccin in, 463
  vacuolar, from lemon juice sacs, 291
$H^+$-pyrophosphatase-like protein, from Arabidopsis, expression in yeast, 620
*Haematococcus pluvialis*, chloroplasts of, phytoene desaturase in, 1261
*Halomonas elongata*, solute from, tobacco hyperosmotic tolerance and, 1239
Heat shock proteins
  in apple, 291
  in Arabidopsis seeds, desiccation tolerance and, 1099
  protein refolding and, in pea, 189
Hechtian strands, of tobacco and *Ginkgo biloba*, in cold-hardened cells, 1365
Hedge bindweed, RNase-related protein from, 433
*HEMA1* mRNA, in Arabidopsis, effect on heme and chlorophyll biosynthesis, 49
Heme biosynthesis, in Arabidopsis, *HEMA1* mRNA effect on, 49
Hemoglobin cDNA, ancient, from *Physcomitrella patens*, 1458
Herbicide
  peroxidizing, resistance to, in tomato, 75, 987
  wheat GST and, 692
Histidine biosynthetic pathway, ATP-phosphoribosyl transferase in, in Arabidopsis, 907
*Hordeum vulgare* (*see* Barley)
Hydrogen gas, photobiological production of, in *Chlamydomonas reinhardtii*, 127
Hydrogen peroxide, oligogalacturonide-induced, effect on auxin-regulated *rolB* gene expression in tobacco leaves, 1379
Hyperosmotic stress, activation of salicylic acid-induced protein kinase by, 1355
Hypocotyls, of Arabidopsis
  elongation and flowering times of, 1149
  high-irradiance response of, phytochrome A photoperception in, 147

I

Indian mustard
  arsenic in, 1171
  in selenium assimilation and volatilization from dimethylselenoniopropionate, 1281
Indoleacetic acid, basipetal transport of, Arabidopsis root gravitropism and, 481
Inositol phosphate metabolism, in Arabidopsis mesophyll cells, 1209
Ion accumulation and fluxes, in barley leaves, 835
*Ipomoea batatas* (*see* Sweet potato)
Iron deficiency, in Arabidopsis roots, 1109
Iron reduction, by beet leaf protoplasts, 337
Iron-superoxide dismutase, alfalfa winter survival and, 1427
Isoleucine feedback, Arabidopsis threonine dehydratase/deaminase insensitivity to, 619

J

Jojoba, embryo of
  fatty acyl-coenzyme A in, expression in rapeseed, 635
  wax synthase in, production of in transgenic Arabidopsis seeds, 645
Juice sacs, of lemon, vacuolar $H^+$-ATPase from, 291

L

Leaf protoplasts, of beet, iron reduction by, 337
Leafy spurge, buds of, light-harvesting chlorophyll-binding protein in, 1459
Leaves
  of Arabidopsis, senescence of, bifunctional nuclease in, 169
  of barley, ion accumulation and fluxes in, 835
  of peppermint, monoterpene accumulation in, 205, 215
  of snow gum, respiration of, 915
  of sweet potato
    *S*-adenosylmethionine decarboxylase in, 1459
    metallothionein-like protein from, 291
  of tobacco, auxin-regulated *rolB* gene in, oligogalacturonide-induced $H_2O_2$ expression and, 1379
  of *Zostera marina*, sodium-dependent nitrate transport in, 879
Leek, chloroplasts of, lyso-phosphatidylcholine import into, 845
Lemon, juice sacs of, vacuolar $H^+$-ATPase from, 291
Light, temperature interaction with, in snow gum leaf respiration, 915
Light signaling, auxin in, 621
Light-harvesting chlorophyll-binding protein, in leafy spurge buds, 1459
Lignin synthesis, tomato root peroxidase and, 1119
Linoleate desaturase, extraplastidial, in rapeseed, 715
Lipid biosynthesis, plant genes for, catalog of, 389
*Luffa cylindrica*, oxidosqualene cyclase in, 1459
*Lycopersicon esculentum* (*see* Tomato)
Lyso-phosphatidylcholine, import into leek chloroplasts, 845

M

Magnesium chelatase, in tetrapyrrole biosynthetic pathway of tobacco, 1161
Maize
  aluminum resistance of, 945
  bundle sheath cells of, glutathione reductase protein in, 667
  ferredoxin-dependent sulfite reductase in, 887
  β-glucosidase-aggregating factor in, 563, 1458
  plasma membrane proteins from, aquaporin activity of, 1025
  respiration of, chilling effects on, 199
  root apical meristem of, auxin metabolism in, 925
  root tips of, protein synthesis and anoxia tolerance in, 295
  roots of
    elongation of, abscisic acid and, 967
    nitrate transport by plasma membrane vesicles of, 265
  seeds of, gibberellins and development of, 1081, 1089
Malate dehydrogenase
  cytoplasmatic, in beet, 619
  mitochondrial, in developing grape berry, 1459
*Malus domestica* (*see* Apple)
Matrix attachment region-binding protein, in higher plants, 225
*Medicago sativa* (*see* Alfalfa)
Melon, fruit of, ethylene-suppressed, 977
*Mentha x piperita* (*see* Peppermint)
Mesophyll cells, of Arabidopsis, inositol phosphate metabolism in, 1209
Metallothionein, in broccoli florets, 1457
Metallothionein-like protein, from sweet potato leaves, 291
Mitochondrial malate dehydrogenase, in developing grape berry, 1459
Mitogen-activated protein kinase, Arabidopsis ATMPK4 as homolog of, AT-MEK1 activation of, 1301
Monoterpene, accumulation of in peppermint leaves, 205, 215
Moss, ancient hemoglobin cDNA isolated from, 1458
Mucilage cells, of Arabidopsis seed coat, 345
Mung bean, seeds of, RNA-helicase in, 619
Mustard (*see* Indian mustard)

N

Nickel, localization and speciation of, in *Thlaspi* species, 1343
*Nicotiana tabacum* (*see* Tomato)
Nitrate, assimilation of, in *Chlamydomonas reinhardtii*, 283
Nitrate transport
  in barley roots, 783
  by maize root plasma membrane vesicles, 265
  in rice, 379
  sodium-dependent, in *Zostera marina* leaf cell plasma membrane, 879
Nitric oxide, tobacco aconitase and, 573
Nitrilase, in Arabidopsis clubroot disease, 369
Nitrogen, sulfate assimilation by, in Arabidopsis, 737
Nitrogen fixation, in cyanobacteria, 731
Nitrogenase activity, in *Alnus incana* root nodules, 553
Nodulin gene, of soybean, *Datisca glomerata* nodule mRNA similarity to, 1073
Nucleoside diphosphate kinase, rice coleoptile elongation and, 447

O

Oat, apoplastic ice on, $CO_2$ thermal effect on, 861
Oilseed rape (*see* Rapeseed)
Oleate desaturase, in *Veronia galamensis*, 1457
Oligogalacturonide, $H_2O_2$ induced by, effect on auxin-regulated *rolB* gene expression in tobacco leaves, 1379
Oligosaccharides, bell pepper seed longevity and (*see* Bell pepper)
Omega-3 fatty acid desaturase, from tung seeds, 292
Onion, roots of, alliinase from, 1269
Orthophosphate dikinase, from sugar cane chloroplasts, 293
*Oryza sativa* (*see* Rice)
Osmotic stress
  effect on cell cycle, in germinating tomato seeds, 327
  photosystem I and II inactivation by, in cyanobacteria, 1201
  proline protection against, 1129
*OsNRT1* nitrate transporter gene, in rice, 379
Ovaries, of tomato, gibberellin and parthenocarpy in, 471
Oxidative burst, in cotton cotyledon response to *Xanthomonas campestris*, 757
Oxidative stress, in Arabidopsis, 657
Oxidosqualene cyclase, in *Luffa cylindrica*, 1459

P

Parthenocarpy, gibberellin and, in tomato ovaries, 471
Pea
  chloroplasts of, protein import into, Toc159 receptor and, 813
  desiccation-induced metabolic imbalance in, 597
  GDP-fucose uptake in, during xyloglucan biosynthesis, 867
  plastidial phosphoglucomutase in, *rug3* locus and, 1187
  protein refolding in, small heat shock protein and, 189
  root tips of, border cell production by, $CO_2$ level and, 181
  Rubisco small subunit transit peptide in, Hsp70 recognition domain in, 1289
  seeds of, amino acid transporters in, 319
Pear, *S3-* and *S5RNase* genes in, apple *S-RNase* gene similarity to, 620
Pectic polysaccharides, cell wall pit fields and, in tomato fruit, 775
Pepper (*see* Bell pepper)
Peppermint, leaves of, monoterpene accumulation in, 205, 215
Peroxidase, in tomato roots, effect on lignin and suberin synthesis, 1119
Petal senescence, in petunia, pollination-induced, 1323
Petunia
  *S*-adenosylmethionine synthetase in, 1457
  petal senescence in, pollination-induced, 1323
Phenylalanine ammonia-lyase
  in chickpea, 1458
  feedback regulation of, 107
Phenylarsine oxide, and fusicoccin-induced activation of radish plasma membrane $H^+$-ATPase, 463
Phenylpropanoid pathway, in cinnamic acid 4-hydroxylase transgenic plants, 107
Phosphate, cyclic nucleotide phosphodiesterase regulated by, in tomato, 543
Phosphoglucomutase, plastidic
  in Arabidopsis, 1193
  in pea, 1187
Phospholipase D alpha, from tomato, 292
Photoperception, of phytochrome A by Arabidopsis hypocotyls, high-irradiance response and, 147
Photosynthesis, in cyanobacteria, 731
Photosystem(s) I and II, osmotic stress inactivation of, in *Synechococcus*, 1201
Photosystem(s) II, polypeptide of, in cucumber, 620
Phototropin, in fern, 1458
Phototropism, of Arabidopsis roots, gravitropism interaction with, 453
*phyB*, in control of elongation and flowering times of Arabidopsis hypocotyls, 1149
*Physcomitrella patens*, ancient hemoglobin cDNA isolated from, 1458
Phytochelatin, arsenic detoxification by, 793
Phytochrome A, Arabidopsis hypocotyl photoperception of, high-irradiance response and, 147
Phytochrome-regulated genes, in Arabidopsis seedlings, 15
Phytoene desaturase, in *Haematococcus pluvialis* chloroplasts, 1261
*Phytolacca americana* (*see* Pokeweed)
Pineapple, Cu/Zn-superoxide dismutase in, 619
*Pinus resinosa*, strobili of, ubiquitin-conjugating enzyme in, 1457
*Pisum sativum* (*see* Pea)
Plant gene register, 291, 619, 1457
Plasma membrane, of *Zostera marina*, sodium-dependent nitrate transport in, 879
Plasma membrane $H^+$-ATPase, of radish, phenylarsine oxide and fusicoccin in, 463
Plasma membrane proteins, aquaporin activity of, in maize, 1025
Plasma membrane vesicles, of maize root, nitrate transport by, 265
Plastidial metabolism, in developing rapeseed embryos, 767
Plastids, phosphoglucomutase in
  in Arabidopsis, 1193
  in pea, 1187
*Plectonema boryanum* (*see also* Cyanobacteria)
  photosynthesis and nitrogen fixation genes in, 731

Pokeweed, seeds of, antimicrobial protein from, 1015
Pollen tube contents, of *Torenia fourniere*, explosive discharge of, 11
Pollination, petunia petal senescence induced by, 1323
Poplar, cold-acclimating bark of, β-1,3-glucanase from, 1458
Potassium currents and uptake, in wheat root cells, 1387
Potato
  cystathionine-γ-synthase from, 293, 619
  stomatal guard cells of, *StGCPRP* gene in, 677
Proline
  hypersensitivity to, in Arabidopsis sugar signaling mutant, 357
  in protection from osmotic stress, 1129
Protein 14–3–3, in Arabidopsis chloroplast stroma, 235
Protein kinase
  calcium-dependent, in sandalwood, 1035
  salicylic acid-induced, hyperosmotic stress activation of, 1355
Protein refolding, small heat shock protein and, in pea, 189
Protein synthesis, in maize root tips, 295
Proton buffering pools, luminal and localized, in thylakoid membranes, 583
Protoplasts, of beet leaves, iron reduction by, 337
Protoporphyrinogen IX oxidase, peroxidizing herbicide resistance and, in tomato, 75, 987
*Prunus armeniaca* (*see* Apricot)
*psbA* gene expression, in cyanobacteria, redox control of, 505
*P69E* and *P69F* genes, in tomato, 67

R

Rac-like GTP-binding protein, from cotton, 292
Radicle emergence, of Arabidopsis, abscisic acid and sugar effects on, 1179
Radish, plasma membrane $H^+$-ATPase of, phenylarsine oxide and fusicoccin in, 463
Rapeseed
  ATP:citrate lyase compartmentation in, 1225
  embryos of, carbon partitioning and plastidial metabolism of, 767
  extraplastidial linoleate desaturase in, 715
  glycinebetaine production in, stress tolerance and, 747
  jojoba embryo fatty acyl-coenzyme A expression in, 635
*Raphanus sativus* (*see* Radish)
*Rauvolfia serpentina*, phytochelatin from, arsenic detoxification by, 793
Redox, control of *psbA* gene expression by, in cyanobacteria, 505
Respiration
  of maize, chilling effects on, 199
  of snow gum leaves, 915
Rice
  coleoptile elongation in, nucleoside diphosphate kinase and, 447
  cysteine proteinase gene in, 57
  cytosolic glutamine synthetase in, 1459
  nitrate transporter gene in, 379
  stem growth of, gibberellin-induced gene and, 695
  UMP synthase in, 1458
  *XET*-related genes of, 853
RNA-helicase, in mung bean seeds, 619
RNase-related protein, from hedge bindweed, 433
*rolB* gene, of tobacco leaves, auxin-regulated expression of, oligogalacturonide-induced $H_2O_2$ and, 1379
Root(s)
  of Arabidopsis
    clubroot disease of, nitrilase in, 369
    gravitropism and phototropism in, 453
    gravitropism of, auxin transport and, 481
    iron deficiency of, 1109
  of barley
    anion conductance into xylem parenchyma of, 243
    nitrate transporters in, 783
  of maize
    apical meristem of, auxin metabolism in, 925
    elongation of, abscisic acid and, 967
    nitrate transport by plasma membrane vesicles of, 265
  of onion, alliinase from, 1269
  of tomato, peroxidase effect on lignin and suberin synthesis in, 1119
  tuberous, of sweet potato, cathepsin B-like cysteine proteinase in, 620
  of wheat, ion uptake and currents in, 1387
Root hair formation, in Arabidopsis, At-PRP3 protein and, 705
Root nodules, of *Alnus incana*, nitrogenase activity in, 553
Root tips
  of maize, protein synthesis and anoxia tolerance in, 295
  of pea, border cell production by, $CO_2$ level and, 181
Rubisco
  electron transport and, in tobacco chloroplasts, 491
  small subunit transit peptide of, in pea, 1289
*rug3* locus, of pea, plastidial phosphoglucomutase encoding by, 1187
Rye (*see also* Triticale)
  apoplastic ice on, $CO_2$ thermal effect on, 861
  catalase isozyme polypeptides in, 1447

S

*S3-* and *S5RNase* genes, in Japanese pear, apple *St-RNase* gene similarity to, 620
*Saccharomyces cerevisiae*, *Veronia galamensis* oleate desaturase expression in, 1457
Salicylic acid
  in cotton cotyledon response to *Xanthomonas campestris*, 757
  metabolic turnover of, in willow, 895
Salicylic acid-induced protein kinase, hyperosmotic stress activation of, 1355
*Salix myrsinifolia* (*see* Willow)
Salt stress, celery sucrose transporter in, 1447
Sandalwood, calcium-dependent protein kinase in, 1035
*Santalum album* (*see* Sandalwood)
Seaside arrow grass, cyanogenic glucoside biosynthesis in, 1311
*Secale cereale* (*see* Rye)
Seed coat, of Arabidopsis, mucilage cells of, 345
Seedlings, of Arabidopsis
  abscisic acid and sugar effects on, 1179
  phytochrome-regulated genes in, 15
Seeds
  of Arabidopsis
    jojoba embryonic wax synthase expression in, 645
    small heat shock proteins in, desiccation tolerance and, 1099
    testa effects on, 403, 415
  of bell pepper, oligosaccharides and longevity of, 1217
  of maize, gibberellins and development of, 1081, 1089
  of mung bean, RNA-helicase in, 619
  of pea, amino acid transporters in, 319
  of pokeweed, antimicrobial protein from, 1015
  of tomato, germinating, cell cycle events in, 327
  of tung, omega-3 fatty acid desaturase from, 292
Selenium, assimilation and volatilization of from dimethylselenonio propionate, Indian mustard in, 1281
Senescence, bifunctional nuclease in, 169
Shade avoidance, auxin in, 621
*Silene vulgaris*, phytochelatin from, arsenic detoxification by, 793
*Simmondsia chinensis* (*see* Jojoba)
Snapdragon
  apical meristems of, developmental zones in, 1137
  AT-hook DNA-binding protein from, 292
  floral scent of, biochemical and molecular genetic aspects of (*see* Snapdragon)
Snow gum, leaves of, respiration of, 915
Sodium, nitrate transport dependent on, in *Zostera marina* leaf cell plasma membrane, 879
Sodium currents and uptake
  effect of Arabidopsis *HKT1* gene on, 1249
  in wheat root cells, 1387
Sodium influx, toxic, in wheat, 823
Soybean
  field-grown, ultraviolet protection in, 117, 1461
  nodulin gene of, *Datisca glomerata* nodule mRNA similarity to, 1073
  nuclear and plastidic genes coding for acetyl-coenzyme A carboxylase in, 1057
Spinach, ATP:citrate lyase compartmentation in, 1225
*Spinacia oleracea* (*see* Spinach)
Starch formation, in barley endosperm, 1459
Starch synthase(s) I, in barley, 1459
Starch synthase(s) I and II, granule-bound, in wheat, 255
Stems
  of Arabidopsis, senescence of, bifunctional nuclease in, 169
  of rice, growth of, gibberellin-induced gene and, 695
  of snapdragon, developmental zones in, 1137

*StGCPRP* gene, in potato stomatal guard cells, 677
Stomatal guard cells, of potato, *StGCPRP* gene in, 677
Stomatal opening, in broad bean, ultaviolet action spectrum and, 99
Stress response proteins, in cell wall of ripening grape berry, 803
Stress tolerance (*see also specific stressor*)
glycinebetaine production and, 747
*St-RNase* gene, in apple, similarity to Japanese pear, 620
Strobili, of *Pinus resinosa* ubiquitin-conjugating enzyme in, 1457
Suberin synthesis, tomato root peroxidase and, 1119
Subtilisin-like proteinases, from tomato, 67
Sucrose transporter, of celery, in salt stress, 1447
Sugar, Arabidopsis radicle emergence and, 1179
Sugar beet (*see* Beet)
Sugar cane, chloroplasts of, orthophosphate dikinase from, 293
Sugar signaling, in Arabidopsis mutant, hypersensitivity toward proline in, 357
Sulfate, assimilation by nitrogen, in Arabidopsis, 737
Sulfite reductase, ferredoxin-dependent, in maize, 887
Sweet potato
leaves of
*S*-adenosylmethionine decarboxylase in, 1459
metallothionein-like protein from, 291
tuberous root of, cathepsin B-like cysteine proteinase in, 620
*Synechococcus*, photosystems I and II in, osmotic stress inactivation of, 1201
*Synechocystis*, *psbA* gene expression in, redox control of, 505

T

Temperature, irradiance interaction with, in snow gum leaf respiration, 915
Testa, effect on Arabidopsis seeds, 403, 415
Tetrapyrrole biosynthesis
in Arabidopsis, *HEMA1* mRNA effect on, 49
in tobacco, magnesium chelatase activity in, 1161
*Thlaspi* species, localization and speciation of nickel in, 1343
Threonine dehydratase/deaminase, in Arabidopsis, isoleucine feedback insensitivity of, 619
Threonine phosphorylation, in activation of Arabidopsis ATMPK4, 1301
Thylakoid membranes, luminal and localized proton buffering pools in, 583
Tobacco
aconitase from, nitric oxide and, 573
ATP:citrate lyase compartmentation in, 1225
fatty acid synthesis and, 1231
chloroplasts of, electron transport and Rubisco activity in, 491
glycinebetaine production in, stress tolerance and, 747
Hechtian strands of, in cold-hardened cells, 1365
hyperosmotic tolerance in, ectoine and, 1239
leaves of, auxin-regulated *rolB* gene in, oligogalacturonide-induced $H_2O_2$ expression and, 1379
matrix attachment region-binding protein in, 225
osmotic stress in, proline in protection from, 1129
tetrapyrrole biosynthetic pathway of, magnesium chelatase activity in, 1161
tryptophan decarboxylase and tyrosine decarboxylase gene expression in, 933
Toc159 receptor, and protein import into pea chloroplasts, 813
Tomato
defense gene activation of, allene oxide synthase expression and, 1335
fruit of
cell wall pit fields in, pectic polysaccharides and, 775
cell wall-modifying proteins in, auxin regulation of, 527
γ-glutamyl transpeptidases from, affinity for glutathione and glutathione *S*-conjugates, 1417
matrix attachment region-binding protein in, 225
ovaries of, gibberellin and parthenocarpy in, 471
phosphate-regulated cyclic nucleotide phosphodiesterase in, 543
phospholipase D alpha from, 292
putative brassinosteroid mutants in, 85
resistance to peroxidizing herbicide in, 75, 987
roots of, peroxidase effect on lignin and suberin synthesis in, 1119
seeds of, germinating, cell cycle events in, 327
subtilisin-like proteinases from, 67
*Torenia fourniere*, pollen tube contents of, explosive discharge of, 11
*Triglochin maritima* (*see* Seaside arrow grass)
Triticale (*see also* Rye; Wheat)
aluminum tolerance genes in, 687
*Triticum aestivum* (*see* Wheat)
Tryptophan decarboxylase gene, in tobacco, 933
TTG1-like protein, 1458
Tung, seeds of, omega-3 fatty acid desaturase from, 292
Tyrosine decarboxylase gene, in tobacco, 933

U

Ubiquitin-conjugating enzyme, in *Pinus resinosa* strobili, 1457
Ultraviolet light
broad bean stomatal opening and, 99
protection from, in field-grown soybean, 117, 1461
UMP synthase, in rice, 1458

V

Vacuolar $Ca^{2+}$-ATPase, in cauliflower, 517
Vacuolar $H^+$-ATPase, in lemon juice sacs, 291
VAMP (*see* Vesicle-associated membrane protein)
*Veronia galamensis*, oleate desaturase in, 1457
Vesicle-associated membrane protein (VAMP), in carrot cells, 25
*Vicia faba* (*see* Broad bean)
*Vigna aconitifolia*, osmotic stress in, proline in protection from, 1129
Villin-like proteins, actin-binding, in Arabidopsis, 35
*Vitis vinifera* (*see* Grape)

W

Wax synthase, of jojoba embryo, production of in transgenic Arabidopsis seeds, 645
Wheat (*see also* Triticale)
chloroplasts of, hexaploid, nucleotide sequence of, 292
granule-bound starch synthase I and II in, 255
GST from, effect on fenoxaprop-ethyl, 692
roots of, ion uptake and currents in, 1387
toxic sodium influx in, 823
young plants of, $CO_2$ concentration and, 1399
Willow, salicylates of, metabolic turnover of, 895
Winter survival, of alfalfa, iron-superoxide dismutase and, 1427

X

*Xanthomonas campestris*, salicylic acid and oxidative burst in cotton cotyledon response to, 757
*XET*-related genes, of rice, 853
Xylem, salt delivery to, in barley roots, 243
Xyloglucan biosynthesis, GDP-fucose uptake during, in pea, 867

Y

Yeast
Arabidopsis $H^+$-pyrophosphatase-like protein expression in, 620
green, plant cells as, 999

Z

*Zea mays* (*see* Maize)
Zeaxanthin epoxidase, apricot fruit gene coding for, 291
Zinnia, senescence of, bifunctional nuclease in, 169
*Zinnia elegans* (*see* Zinnia)
*Zostera marina*, leaf cell plasma membrane of, sodium-dependent nitrate transport in, 879
